

Covid -19 Secure Gurdwara Sahib Check List

1. Circulation Design:

This is to minimise facial /cross over contact-this may need use of fire exists and creation of marked walkways. Screens, ropes and floor tapes would be needed.

- Creative designs would minimise risks.

2. Protections of staff and regular volunteers:

- Visors, masks, gel, disposable apron, disposable gloves etc would be required. Other measures for sangat would also protect them.

3. Sangat/Congregation members:

- Hand washing facility with paper towels, gels and circulation /distance markings needed along with checking of temperatures at the entry point.
- Sangat members to wear own masks at entry and retain the cover whilst in the Gurdwara Sahib.

4. Material Requirements: -

- Written risk assessments and procedures to minimise infection transmission
- Training of staff, committee members and volunteers
- Stock of disposable masks, gloves and aprons for staff and regular volunteers
- Gels
- Paper towels with dispensers
- High visibility floor tape
- Plastic or other materials to construct screens
- Signage at key points
- Posters setting out processes
- Face visors for key staff and volunteers
- Stock of liquid antibacterial soap
- Thermometers for distancing checking
- Stock of kitchen rolls (if wraps are provided for langar)
- Disinfectant sprays, wipes and in liquid form
- Perspex or other material for periodic wiping near the matha tek area should it be used rather than encouraging standing namashkar
